

# December report 2024 Public Works

- Broken pin on tractors loader. The loader needs bushings replaced to prevent breaking more pins in the future
- TruGreen metals picked up scrap metal piles in yard and at the transfer station
- Put snow tires on the village truck
- Gravelled icy roads
- Got parts from Darren and fixed the snow wing on the grader
- Installed new pin on tractor loader
- Put up Christmas lights
- Moving snow piles around the village and working on widening roads
- Had furnace issues at HGCC, rink and village shop. All resolved.
- Changed blades on the grader
- HGCC boiler hasn't been working the best lately. Needs to be reset weekly and should be looked into.
- Could really use a snow bucket for the skid steer. This would make clearing ally's and moving snow piles more efficient.
